ODOR NEUTRALIZER

ADVANCED BACTERIAL ENZYME COMBATANT

ODOR NEUTRALIZER is an advancement in bio-technology. A Botanical Base, Bacterial Enzyme Combatant that effectively neutralizes pathogens and completely suppresses odor producing bacteria instantly on contact without the use of masking agents or fragrances.

Use **ODOR NEUTRALIZER** as a preventive spray by treating the incoming trash. Spray down travel lanes to control odors caused by seepage of incoming trucks. Quickly spray empty trucks, roll-offs and bins before leaving the facility. Treat all material used for compost to neutralize pathogens, promote biodegradation and reduce the holding period needed to sterilize compost before use. Use with perimeter misters to prevent airborne bacteria from drifting and maintain an odorless environment at the facility and with the surrounding neighbors. **ODOR NEUTRALIZER will not clog emitters.**

APPLICATION RATES (pph)

IN LINE SPRAY SYSTEMS

Inject or dose 1 gallon of ODOR NEUTRALIZER per every 200 gallons of water. Tank premix 1-200.

Adjust the volume of spray to meet the rate of speed rubbish travels beneath spray tips for proper coverage.

HOT & COLD PRESSURE WASHERS

ODOR CONTROL

Calibrate equipment to dispense 1 gallon of ODOR NEUTRALIZER into a minimum of 150 gallons of water. Using a wide fan tip, make one pass over empty bins and roll-offs. Spray empty trucks as needed.

CLEANING

Calibrate washer to dispense ODOR NEUTRALIZER at the rate of 1 - 200 gallons of water.

MISTING SYSTEMS

Meter 1 gallon of ODOR NEUTRALIZER per every 400 gallons of water. ODOR NEUTRALIZER will maintain a clean flowing system and will not clog emitters.

COMPOST

Mix 1 gallon of ODOR NEUTRALIZER with a minimum of 200 up to 300 gallons of water. Spray over stockpiles using a Water Truck or other high volume dispenser. Apply as needed or saturate pile.
